SUMMARY

I am a bioinformatician specializing in genomics and NGS data analysis, with a strong focus on algorithmic foundations in computational biology. I go beyond black-box tool usage by studying source code, underlying algorithms, and assumptions to build robust, reproducible pipelines. My long-term interest lies in gene expression dynamics and biochemical pathways, bridging biological questions with computational methods.

WORK HISTORY

Bioinformatician

06/2023 - 04/2025

KTest Viet Nam

I analyze biological data, primarily next-generation sequencing (NGS) data, and help develop analysis pipelines.

Project

First author

2024 - 2025

<https://www.biorxiv.org/content/10.1101/2025.07.18.665609v1>

Imputation and polygenic score performance of low-coverage whole-genome sequencing and genotyping arrays in diverse human populations

EDUCATION

Biotechnology

09/2018 - 08/2022

Ho Chi Minh City University of Technology

Biotechnology design project:

"PROCESSING SEQUENCING AND GENERAL ANALYSIS OF GENOME OF BACTERIOPHAGES FOR THE PREVENTION AND TREATMENT OF LIGHT SHRIMP DISEASE", by Assoc.Prof.Dr. Hoang Anh Hoang guide.

University thesis:

"PROCESSING PROCEDURE AND GENERAL ANALYSIS OF GENOME OF TREATMENT OF HEALTH DISEASES IN CAT FISH", by Assoc.Prof.Dr. Hoang Anh Hoang guide

Master of Biotechnology

2022 - 2026

Ho Chi Minh City University of Technology

Thesis :

"IN SILICO COMPARISON OF LOW-PASS SEQUENCING AND GENOTYPING ARRAY FOR IMPUTATION PERFORMANCE IN DIVERSE HUMAN POPULATIONS", by Assoc.Prof.Dr. Hoang Anh Hoang, and PhD. TS. Nguyễn Thụy Vy guide
